Global Superstore Performance

A review of the supplied Power BI report, its findings, and the decisions its current visuals can support

Objective and findings

Objective: review sales, profit, shipping, category, geography, product, and customer visuals in the supplied Power BI file and identify actionable follow-up.

- The report totals 12.64M in sales and 1.47M in profit. Profit divided by sales is about 11.6%; this is a simple overall ratio, not a trend or a category margin.
- The shipping-mode chart shows Standard Class as the largest sales contributor. The report does not pair this view with delivery cost or profit margin by ship mode.
- Category visuals cover Furniture, Office Supplies, and Technology. Their clustered measures and limited labels make category profitability difficult to compare precisely.
- The report also includes region, market, state, product ID, and customer discount views. These offer exploratory coverage, but several pages retain different slicer selections.

Strengths, gaps, and actions

- Strengths: headline sales and profit KPIs are visible, and the file includes multiple business dimensions for exploration.
- Gaps: month/year trends and customer-segment performance are not shown. Some visuals combine sums with different units, and page titles/labels are mostly autogenerated.
- Use one measure per axis or separate small charts. Add profit margin, discount rate, and shipping cost measures to compare profitability rather than volume alone.
- Add monthly and yearly sales/profit trends plus a customer-segment breakdown; keep slicer defaults consistent and label the selected filter state on every page.
- Prioritize review of discounting and shipping economics in high-sales areas, then validate any action against profit margin and period-over-period results.

Conclusion Sales and profit are substantial, with an overall profit-to-sales ratio of approximately 11.6%. The report is useful for an initial review; its current design does not yet support reliable comparisons across time, customer segments, or profit by category. The six original report pages follow as a visual appendix.
